SUBJECT: CC Docket No. 00-249

TO: Ms. Marlene Dortch
445 12th St., S.W., Room TWB-204
Washington, D.C. 20554

Please place this memorandum and the attached documents in the record in CC Docket No. 00-249.

The attached documents are **Cox's Exhibits 3 through 32** and are marked accordingly. We do **not** attach copies of Cox's Exhibits 1 and 2 because those documents are pre-filed testimony already found in the record and are voluminous. Also attached is Cox's exhibit list.

If you require further information, please contact me at (202) 418-1593. Thank you for your assistance. An original and two copies are provided.

Cox Exhibit No. 3

ITEM: Cox 1-1

What is the distance from each Verizon tandem switch to each Cox switch to which the Verizon tandem switch interconnects?

REPLY:

Cox's location in LATA 248 at Highway 155 in Providence Forge, Virginia (CLLI = PRFRVAPF) is 23 miles from the Verizon Grace Street tandem in Richmond, Virginia (CLLI = RCMDVAGR). Cox's location in LATA 252 at 4585 Village Ave in Norfolk, Virginia (CLLI = NRFLVAJT) is 4 miles from the Verizon Bute Street tandem in Norfolk, Virginia (CLLI = NRFLVABS).

VZ VA #660

ITEM: Cox 1-2

~~Describe the terms of Verizon's interconnection arrangements with each of the other incumbent local exchange carriers in Virginia.~~ In particular, describe whether those arrangements require the other carrier to establish multiple interconnection points or to subsidize Verizon's transport if they do not establish multiple interconnection points and indicate which, if any of those agreements contain provisions analogous to the "GRIP" proposal made by Verizon in this proceeding.

REPLY:

Verizon interconnects with other ILECs in Virginia by means of legacy end-span meets, usually at the certificated boundary of the two companies. This arrangement allows for the interconnecting parties to be responsible for the cost of facilities within their territory. Each ILEC has its own geographic territory. Therefore, Verizon interconnects with other incumbent local exchange carriers in Virginia in a manner that is consistent with the "GRIP" proposal made by Verizon. In other words, the Verizon and other ILEC's interconnection points are geographically relevant to the local traffic that is exchanged and, therefore, is consistent with Verizon's GRIP proposal.

VZ VA #661

ITEM: Cox 1-3 Identify any current agreement between Verizon and a CLEC (other than Cox) or CMRS provider that operates in Virginia that does not contain the "GRIP" provisions proposed by Verizon in this proceeding or analogous provisions.

REPLY: 95 of the 119 interconnection agreements reviewed do not contain the "GRIP" provisions proposed by Verizon in this proceeding or analogous provisions. The list is attached.
